

Hello,

The system for scientific research permit application for is online at the following address: http://www.pc.gc.ca/apps/rps/page1_e.asp in the "Application for Permit" section. The Parks Canada website provides details and explanations on the method to be followed to complete the form. Applications will be automatically sent to the Research Coordinator of the Saguenay-Saint-Laurent. If an element in the form is not applicable to your study, please do not forget to fill each box with a n /a before sending. Also note that the site may be experiencing difficulties registering a session, it is thus less risky to complete the form in one session. Finally, you must set a date (even arbitrary) to the 30d section.

In cases where there is a lack of details, we will contact you by phone.

Have a nice day.

Julie Leblanc
